The land capable of producing wheat is not occupied to anything like one-twentieth of its extent. We can raise grain enough on a small part of territory of the United States to feed the world. f The general conclusion at which I have arrived is that in the year 1880, the census year, when the population of the United Traim States numbered a little over 50, 000, 000, the annual product had a value of nearly, or quite 10, 000, 000, 000 at points of final consumption, including, at market prices, that portion which was consumed upon the farm, but which was never sold. Omitting that consumed upon the farm, it was about 9, 000, 000, 000. i At an average of 200 pounds per head in the United States, the largest consumption of iron of ONE OPERATOR nation, we may yet find that the Serves Hundreds equivalent of one mans work for With Goods. one year) divided between the coal Mr. E. Atkinson, The Distribution of Products, p. 15. tlb. , p. 22. tEd. Atkinson, ib. p. 27. mine, the iron-mine and the iron-furnace, suffices for the supply of 500 persons. One operator in the cotton factory makes cloth for 250; in the woolen factory for 300; one modern cobbler (who is anything but a cobbler), working in a boot or shoe factory, furnishes 1, 000 men or more than 1, 000 women with all the boots and shoes they require for...
