

Semiconductor Silicon

Filesize: 3.81 MB

Reviews

I just started off reading this article ebook. It is actually written in basic words and not confusing. I am just very happy to let you know that this is the best ebook I actually have read through inside my individual daily life and can be the finest ebook for possibly.
(Dayne Johns)

SEMICONDUCTOR SILICON

To download **Semiconductor Silicon** eBook, please follow the hyperlink under and save the ebook or get access to other information which might be relevant to SEMICONDUCTOR SILICON book.

Book Condition: New. Publisher/Verlag: Springer, Berlin | Materials Science and Technology | The summer school on "Silicon: Materials Science and Technology" was held at the Ettore Majorana Centre for Scientific Culture in Erice, Sicily. It was the 16th course of a series in the International School of Materials Science and Technology. The course attracted participants from all over the world. 30 lectures were presented by internationally reputed experts in the field. The proceedings include all the lecture topics of the course. Short notes on the scientific work of the attendees are integrated with the main papers. The semiconductor material silicon is of paramount importance in micro electronics. The various aspects of the silicon materials science and its technology were critically reviewed and the foreseeable future developments of devices and integrated circuits were discussed during the two weeks of the course. The topics ranged from the fundamental physics to the applied science of processing technology and device fabrication covering crystal growth, processing technology, defects, measurement methods, thin films, and device problems. The course brought together theoretical and experimental physicists and engineers from universities, research institutes and industry. The unique setting of the Ettore Majorana Centre in the ancient town of Erice created a friendly atmosphere for fruitful scientific exchange. Long discussions continued over lunch and only ended late at night in the wine cellar of the school. | I Crystal Growth.- Czochralski Growth of Silicon.- Chemical and Physical Considerations in the Chemical Vapor Deposition Process.- Silicon Molecular Beam Epitaxy (Si-MBE).- II Processing.- Simulation of Silicon Processing.- Simulation of Laser-Assisted Doping of Silicon - The Temperature Distribution.- Ion Implantation.- Low Temperature Epitaxial Crystallization of Amorphous Si by Ion-Beam Irradiation.- On the Generation of Ripples on Silicon.- III Defects.- Theory of Defects in Crystalline Silicon.- Defects in CZ Silicon.- Tellurium...
