CHAPTER XIV SOME PRINCIPLES OF MINING MINING is an effective weapon, but it must be applied to suitable objectives, and its use restricted by certain rules which have been deduced from experience. As regards the actual processes, the only important changes to be anticipated are the development of the use of rapid tools and of high explosives. The most vulnerable points in trench-mine warfare are the following: Listening and observation posts in advance of the line; machine-gun and trench-mortar positions; junction-points of communicating-trenches with front line. Mines were employed to attack, and countermines to defend, many besieged cities in the past, but the application of mining methods in trench warfare has at no time or place reached the scientific development which obtains in the present war, though our own Civil War furnishes several examples of its use in connection with the...
