BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 24 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. GAO reviewed the major issues concerning the C-X aircraft program, including the aircrafts limited range and load carrying capabilities. GAO summarized these issues in a report to the Secretary of Defense, dated October 10, 1980, which recommended that the Air Force delay issuing requests for proposals (RFP) for the aircrafts full-scale engineering development until these issues were resolved. The Air Force has begun to evaluate proposals received from three major contractors and plans to award a development contract for the C-X if the program is approved and if congressional funding is authorized. The Air Force estimates that the program could include about 200 aircraft at a cost of 10 to 11 billion for development and production. GAO believes that the C-X range and payload issues discussed in the previous report warrant further consideration, especially the range and payload requirements for the C-X. GAO still believes that the Air Force is specifying a C-X design which is sacrificing the aircrafts primary mission of intertheater airlift to achieve a greater capability to operate within a theater on small, austere airfields. The Air Force requested the contractors to propose an aircraft designed to meet or exceed certain minimum performance specifications and which could best complete the airlift requirements of four airlift scenarios described in the RFP. Although the Air Force has emphasized the importance of procuring a C-X aircraft with the ability to use small, austere airfields, the C-X mission element need statement (MENS) states that the feasibility of requiring this capability will depend upon the extent of its penalty to the primary mission. This item ships from La Vergne, TN. Paperback.
