APress. Paperback. Book Condition: New. This item is printed on demand. Paperback. 700 pages. Silverlight 5 is the latest iteration of Microsofts cross-browser technology for creating rich user experiences on the Web. Like its predecessor, it rides atop the . NET Framework for maximum ease of use and coding efficiency. The new technology carries forward much of the work that has been done before and augments it in many important respects, including support for H. 264 video, major improvements to the graphics engine (including true 3D rendering), and much richer data-binding options for interfacing with other applications. Pro Silverlight 5 in C is an invaluable reference for professional developers who want to discover the new features of Silverlight. Author Matthew MacDonalds expert advice guides you through creating rich media applications using Silverlight in the environment youre most productive in no matter what the target platform. As you learn about the features that put Silverlight in direct competition with Adobe Flash, such as rich support for 2D and 3D drawing, animations, and media playback, youll experience the plumbing of . NET and the design model of WPF through Silverlight all of the same . NET technology that developers use to design next-generation Windows applications. Pro Silverlight 5 in C is a comprehensive tutorial, written from professional developer to professional developer. Please note: the print version of this title is black and white; the eBook is full color. What youll learn To develop rich media applications using Silverlight across browsers and platforms To create a project, set up a layout, and use controls To handle both 2D and 3D drawing, animation, and media playback through Windows Presentation Foundation (WPF) To integrate web services support To use Silverlight in conjunction with ASP. NET and its interactions with HTML Who this book is for This book is...
