# Text-book on practical solid or descriptive geometry Volume 2

Filesize: 8.88 MB

Reviews

Here is the best publication i have got go through until now. It is actually writter in simple phrases and never hard to understand. I realized this publication from my dad and i suggested this ebook to find out.

TEXT-BOOK ON PRACTICAL SOLID OR DESCRIPTIVE GEOMETRY VOLUME 2

To read **Text-book on practical solid or descriptive geometry Volume 2** PDF, you should follow the button under and save the file or have access to other information that are in conjuction with TEXT-BOOK ON PRACTICAL SOLID OR DESCRIPTIVE GEOMETRY VOLUME 2 book.

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 42 pages. Dimensions: 9.7in. x 7.4in. x 0.1in.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1884 Excerpt: . . . other at the points c and d. These four points will be the horizontal traces, and lines through a and b parallel to rs and through c and d parallel to tu will be the plans of the lines in which the cylinders are cut by the plane of which the line q r is the horizontal trace. The points where these lines intersect determines four points in the plan of the intersection of the cylinders. In like manner by drawing lines parallel to r q, assuming these to be the horizontal traces of cutting planes parallel to the first, and drawing lines parallel to r s and t u through the points where these horizontal traces meet the ellipses, other points in the plan of the intersection can be found. 1 To find the elevation draw perpendiculars to X Y from the points where the horizontal traces of the cutting planes meet the ellipses, and through the points where these perpendiculars meet X Y draw lines parallel to rV and fit. These will be the elevations of the lines in which the planes cut the cylinders. The elevation required is determined by the intersection of these elevations. As in the preceding examples, all the lines and planes should be numbered; all lines in the same cutting plane having the same number. The student will notice that the points in the curve of intersection are found from the intersection of those lines having the same number....
